

# Top 10 Tips for Success in IB Geography

## Use Class Time Wisely:

Make sure you use the time we have in class effectively by paying attention, taking good notes and engaging fully in all learning experiences

## Follow current events:

Many of the important current events that occur in the world relate to what we study in geography. A knowledge of current events will help you gain useful contemporary case studies

## Review Class Material Frequently:

You should review what we do frequently. The more frequently you review the more knowledge you will retain for the long term

## Reflect:

Reflection is a very powerful tool. Reflect after every assessment in order to eliminate mistakes you commonly make and to adopt strategies to make you more successful

## Upgrade Geographic Skills:

Geographic skills are essential as they enrich understanding of the subject and increase your ability in assessments while developing useful skills for your future

## Connect With CAS

Geography and CAS connect easily especially in service, you can use your geographic skills and knowledge in CAS which also increases your geographic ability

# CAS

## Collaborate:

Throughout your study you will work in many group situations, effective collaboration will benefit everyone as you are not competing for grades

## Make Good Notes:

Taking and keeping good notes is very important as it will help you retain knowledge and review for in-class and final assessments

## Connect:

Making connections between different parts of the geography course and with the world around you will strengthen your understanding

## Conceptual Understanding:

Knowing the main geographical concepts and synthesizing them with context and content will enhance your chance of success
